

Samantha Cornell

West Coast Rockstar of the Month

Assistant Account Manager

Sutter Hospital

Throughout her tenure with Propark, at Sutter Medical Center Sacramento, Samantha has consistently demonstrated her knowledge, expertise, and unrivaled work ethic on more occasions than can be counted. Since the most recent accelerations in community transmission of COVID-19 (driven by mostly unchecked congregations during the Thanksgiving, Christmas, and Holiday Season) Samantha's continuing, steadfast dedication to enforcement of public health measures (as dictated by the CDC), ascertainment of the truth, and isolation of each possible case (before the employee(s) are even aware that they may have been exposed) has been paramount in slamming the brakes on the spread of this virus within our ranks. This could not have been done, or continue to be done, without Samantha's intimate knowledge of our employee base; their family relations, friendships, and outside associations, which has taken years to learn, understand and assimilate.

As fate would have it, Samantha found herself in a position to single handedly crush, and smother this virus as she saw it rearing its ugly head; not only understanding the social dynamics that exist off the clock, but reaching out to employees, asking the questions (beyond the "prescribed" four), and shedding the light necessary to illuminate the connections to infection that many employees may have not even been cognizant of. Samantha, by casting herself into the midst of this hornet swarm, and through her exhaustive communication efforts, not only defended her team against this invisible threat, but the Company as well. To put it plainly, CDC directives and regulations alone could not have stomped out these clusters, and the glowing embers that emerged as a result... that required a greater mind, and a greater dedication to public/employee health and safety. The personification of these qualities is, simply put, Ms. Samantha Cornell.
